### TIPS FOR FAST AND ACCURATE SEARCHES

The search function on our web-site is very powerful. Any part of a product description can be used to find an item. The trick is to search in a way that pulls up only the items for which you are actually looking. Following the suggestions below will make your searches faster and more accurate.

#### TIRES & TUBES

Regardless of how fancy a tire size appears, just enter the numbers into the search field, no letters, no slashes, no dots, no spaces. Here are some examples:

##### PASSENGER & LIGHT TRUCK TIRES

ITEM NEEDED	ENTER
P235/75R15	2357515
or like this	P2357515 (Optional)
LT265/75R16	2657516
or like this	LT2657516 (Optional)

*Note: Adding a "P" or "LT" to the very beginning of a size narrows down the search to just those load ranges.*

##### FARM & COMMERCIAL TIRES

ITEM NEEDED	ENTER
11L-15	1115
10.00-16	100016
11R22.5	11225
18.4-38	18438
18.4R38	18438 (Optional 184R38)
520/85R42	5208542

*Note: Entering a standard rear farm tire size will also pull up the metric equivalent size, if available.*

Another convenient feature is that, whenever you enter a tire size into the search field, the tubes to fit that size display as well, so, if you're looking for a tube, keep in the tire size. That's all there is to it.

#### BATTERIES, TESTERS & BOOSTER CABLES

The easiest way to find a batteries and accessories is to *Browse The Product Categories* from the first page of the site. You'll find batteries organized by application and voltage. Click on one of the categories shown for a list of batteries from that group. Click on any battery's description to see a larger photo, and a table containing all specifications, including measurements.

Those familiar with the Battery Council International group numbers can search by entering the BCI numbers directly into the search field. BCI numbers are tied to the physical dimensions, voltage, and post

##### BATTERIES

ITEM NEEDED	ENTER
Group 24	524, 624 (see note below)
Group 65	665 (see note below)
Group 4dlt	4dlt
Group 8D	8d
Group 31	31s (stud) or 31p (post)

*Note: All passenger battery BCI numbers are preceded by either a "5" or a "6", which denotes the power level. 5=500 amp range, 6=600 amps and above.*

configurations for all batteries, and are most often printed on the label, or on the battery case itself.

Call if you need more help fitting an application. Our number is 1-800-849-3778.

#### LUBRICANTS

If you have a favorite brand name, enter it into the search field. You can also search by the viscosity or weight of the lubricant. Certain key words work too. Entering words like "hydraulic", "transdraulic", "grease", "engine oil", and "penetrant" will take you straight to each of those products. Below are some examples of lubricant searches:

##### LUBRICANT PRODUCTS

ITEM NEEDED	ENTER
Rotella	Rotella
15w40	1540 or 15w40
10w30	1030 or 10w30
AW-32	AW32
SAE140	SAE140 or 140
80w90	8090 or 80W90
Hydraulic	Hydraulic
Transdraulic	Transdraulic
303 fluid	303
Grease	Grease
Penetrant	Penetrant

*Note: Looking Through Product Categories also works very well for the lubricant line.*

## DISC HARROW BLADES

To search for harrow discs enter the diameter of the blade followed immediately by one of the abbreviations shown below.

DISC HARROW BLADES	
ITEM NEEDED	ENTER
24" Plain	24pl
22" Notched	22nt
24" Plain Cone	24pc
26" Notched Cone	26nc
22" Flat Center Plain	22fcpl
22" Flat Center Notched	22fcnt

## DISC HARROW BEARINGS

Disc harrow bearings are best searched by the number stamped on the side of the race. If that number is not visible, just enter the word *bearing* into the search field and click on the description of the first bearing that comes up. Scroll down a little to see the bearing specification sheet. Bearings shown on that sheet are sorted by axle shape, center hole size, etc. Use the dimensions shown to match your bearing.

DISC HARROW BEARINGS	
ITEM NEEDED	ENTER
Disc Harrow Bearing	Bearing
w208ppb5	w208ppb5

*Note: Click on any bearing description after searching to display more information page with all measurements.*

## TILLAGE TOOLS

The easiest way to locate tillage tools is to *Look Through Our Product Categories*. You'll find small photos representing each of the tillage lines. Click on one of those photos to see the products of that class. Click on the description of any item to display the *More Information Page*. Also, be sure to display the *Item Snapshot* if one is available. These snapshots include a huge amount of technical data, including a link to the supplier's web-site.

You can enter the name of a tillage tool item directly into the search field and go right to it. Here are some examples of how that works:

TILLAGE TOOLS	
ITEM NEEDED	ENTER
Row Crop Sweep	Row Crop
Peanut Sweep	Peanut
Chisel Spike	Chisel
Subsoiler Point	Subsoiler
Vibrator Sweep	Vibrator
Double Shovel	Double Shovel

*Note: Looking Through Product Categories works very well for this line, but you can directly enter as shown above.*

## COULTER BLADES

Key in the word "coultter." Click on the product description to see the *More Information Page*. Click on the *Item Snapshot* button to see more technical data.

COULTER BLADES	
ITEM NEEDED	ENTER
Coultter Blade	Coultter

*Note: Click on any coultter description to display More Information Page. Click on Item Snapshot for full specs.*

## ROLLER CHAIN

Enter the words *Roller Chain* into the search field to see all chain, including offset and connector links.

## BALING TWINES & NET WRAP

Enter the word *Twine* into the search field to see all baling twine and net wrap. *Note: Prices shown for twine are based on single bale purchases. Discounts are available for quantity orders.*

## CUTTING PARTS

*Look Through Our Product Categories* to familiar yourself with the cutting part lines offered. Do a search on any product category and you'll notice that we make extensive use of abbreviations in product descriptions. These abbreviations indicate the brands of equipment that actually utilize the part number shown. Click on any item description and scroll to the bottom of the page to see a listing of abbreviations and the manufacturers they represent.

As with other lines, you can search directly for specific cutting parts. Enter your searches as shown below.

COMPLETE SICKLE ASSEMBLIES	
ITEM NEEDED	ENTER
New Holland 489	nh489
John Deere 1209	jd1209

*Note: Enter brand abbreviation followed by the model #.*

DISC MOWER KNIVES	
ITEM NEEDED	ENTER
New Holland 617 Knives	nh617
John Deere 930 Knives	jd930

*Note: Enter brand abbreviation followed by the model #.*

SICKLE SECTIONS	
ITEM NEEDED	ENTER
New Holland Section	nhsection
John Deere Section	jdsection

*Note: Enter brand abbreviation followed by "section."*

GUARDS	
ITEM NEEDED	ENTER
New Holland Guard	nhguard
John Deere Guard	jdguard

*Note: Enter brand abbreviation followed by "guard."*
